DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Response to Arguments

Applicant's arguments as they pertain to the drawing objection of reference character (44) designating both a target mechanism and target member have been fully considered and are persuasive. The objection to the drawings have been withdrawn. Applicant's arguments, filed 1/14/09, with respect to the prior art reference of JP 2005-260176 have been fully considered and are persuasive. The rejection of the Japanese Reference has been withdrawn.

Allowable Subject Matter

Claims 1-6 allowed.

The following is an examiner's statement of reasons for allowance: **The primary reason for allowance is that prior art does not teach a vertical heat treatment system including a first sensor attached to the base of a transfer mechanism that**

emits a light beam toward a direction in which the substrate support device moves and detects a target member upon receiving a reflected light of the beam and second sensors attached to two tip end portions of the substrate support devices which detects interruption of the light beam traveling between the two end tip portions, nor a control unit that deduces the position of the target based on the signals received from the light beams.
